Education

Anna University   Sep. 2020 – May 2024
Bachelor of Science in Computer Science   *Coimbatore, TN*

Coursework

- Data Structures
- Operating System
- Database Management
- Artificial Intelligence
- Computer Network

Experience

Oasis Infobyte   Feb 2024 – March 2024
Web Development and Designing Intern   *Satya Nikeetan, New Delhi*

- As a passionate and detail-oriented individual, I am seeking an internship opportunity with Oasis Infobyte to contribute to web development and design projects. Eager to apply my skills in creating impactful and user-friendly landing pages and portfolios, as well as developing practical solutions like a temperature converter.
- Collaborated with a team to design and develop an engaging landing page for a client.Utilized HTML5, CSS3, and JavaScript to create interactive elements and animations.
- Led the development of a portfolio website showcasing the company's projects and services. Designed and implemented a visually appealing and user-friendly interface using Bootstrap. Integrated multimedia elements, including images and videos, to enhance the portfolio's presentation.
- Developed a temperature website using JavaScript.

OctaNet   Sep 2023 – Oct 2023
Python Development Intern   *Bhubaneshwar, Odisha*

- Collaborated with a dynamic team to develop an ATM interface using Python, contributing to the enhancement of financial transaction systems.
- Designed and implemented Python scripts to establish communication between the ATM hardware components and the backend systems, ensuring seamless transaction processing.
- Implemented secure authentication protocols to safeguard user information during transactions, adhering to industry best practices and security standards

Projects

Library Management System | *HTML, CSS, JavaScript and MYSQL*   Oct 2023

- Designed and developed a comprehensive Library Management System using HTML JavaScript and CSS MYSQL to streamline library operations and improve efficiency.
- Implemented intuitive user interfaces for librarians and patrons, allowing for easy navigation and efficient management of library resources.

Quiz Application | *Html, CSS, JavaScript*   November 2023

- Designed and developed a dynamic Quiz Application using HTML, CSS, and JavaScript, showcasing proficiency in front-end web technologies. This project aimed to create an engaging and interactive platform for users to test their knowledge on various subjects.
- Create a web-based Chat Application with HTML,CSS and JavaScript for two-way communication.
- Designed a user-friendly platform for real-time chatting.

Ecommerce Website | *React, JS,*   Feb 2024

- Create a feature-rich e-commerce platform entirely in React.js, incorporating essential functionalities such as product listings, shopping cart management, and secure payment processing.

Technical Skills

Languages: Python, C, HTML/CSS, JavaScript, SQL
Developer Tools: VS Code, Eclipse, Google Cloud Platform, Android Studio
Technologies/Frameworks: Chatgpt, Firbase, GitHub, Git, WordPress

Awards / Achievements
